

GoLedger

Blockchain networks for businesses

No-Code Enterprise Blockchain-as-a-Service

Nov 2024

Businesses struggle with connecting old and new technologies while keeping data private, safe and clear and handling complicated processes...

...and **productivity** pays the price.

email and
spreadsheets are
not private

information is **siloed**
and exchange is **hard**
between companies

46% of organizations
experienced fraud in
the last **24** months

Blockchain technology helps...

Security keeps fraud at bay

Distribution helps integration between parties

Traceability increases trust

...but,

36% of companies expect a more **affordable** option

36% of companies expect an **easier** option

42% of companies expect a more **flexible** option

What if...

...businesses could invite partners to **share data**?

...**integration** could be done in a **few minutes**?

...the structure could be **scaled** as needed **with a click**?

GoFabric: Blockchain network ready in under 10 minutes

- **Asset data mapping**
- **GoFabric will build the code for it**
- **Smart contract marketplace**

GoBesu: **Ethereum tokens** deployed in private networks

The screenshot displays the GoBesu web interface. On the left is a navigation sidebar with sections for 'ORGANIZATION /' (Overview, Nodes, APIs, Settings) and 'BUSINESS GROUP /' (Overview, Networks, Contracts, Organizations, Proposals, Settings). The 'Networks' section is active, showing a list of networks including 'drex'. A modal window titled 'Build a Contract' is open, showing the 'Contract Details' section with fields for 'Contract Name' (DrexToken) and 'Version' (1.0). Below this is the 'Token Details' section with fields for 'Token Name' (DrexToken) and 'Token Symbol' (DREX). A 'Build Contract' button is at the bottom right of the modal. An information icon and text at the bottom left of the modal state: 'The user will be able to view the contract after you create it'.

- *Embedded tokenization*
- *No-code token creation*

GoFabric/GoBesu is subscription based

and affordable

Billed by organization.

Plan features increase on scalability basis.

Market Interest

87% of companies are likely to invest in a blockchain solution in the next 12 months

89% use off-the-shelf tools, and more than 50% prefer third-party tools instead of in-house solutions

50% of the companies that have a deployed blockchain are still considering the right blockchain provider

*of 603 polled companies in the US, UK and China by CasperLabs

Competitors

Amazon Managed Blockchain *technical knowledge, lock-in*

Oracle Blockchain Service *technical knowledge, lock-in*

Chainstack *crypto focused BaaS*

Kaleido *lock-in*

GoFabric

No specialist required

Build and deploy with no-code tools

Users manage and scale networks with a few clicks

Everything that is deployed in user-owned

Legacy systems connections ready-to-go with APIs

Our future is making blockchain **more accessible** worldwide

for developers & businesses

2023

- Release **GoFabric** as a full platform and subscription service **worldwide**
- Consolidate GoLedger as the **go-to blockchain provider** in Brazil

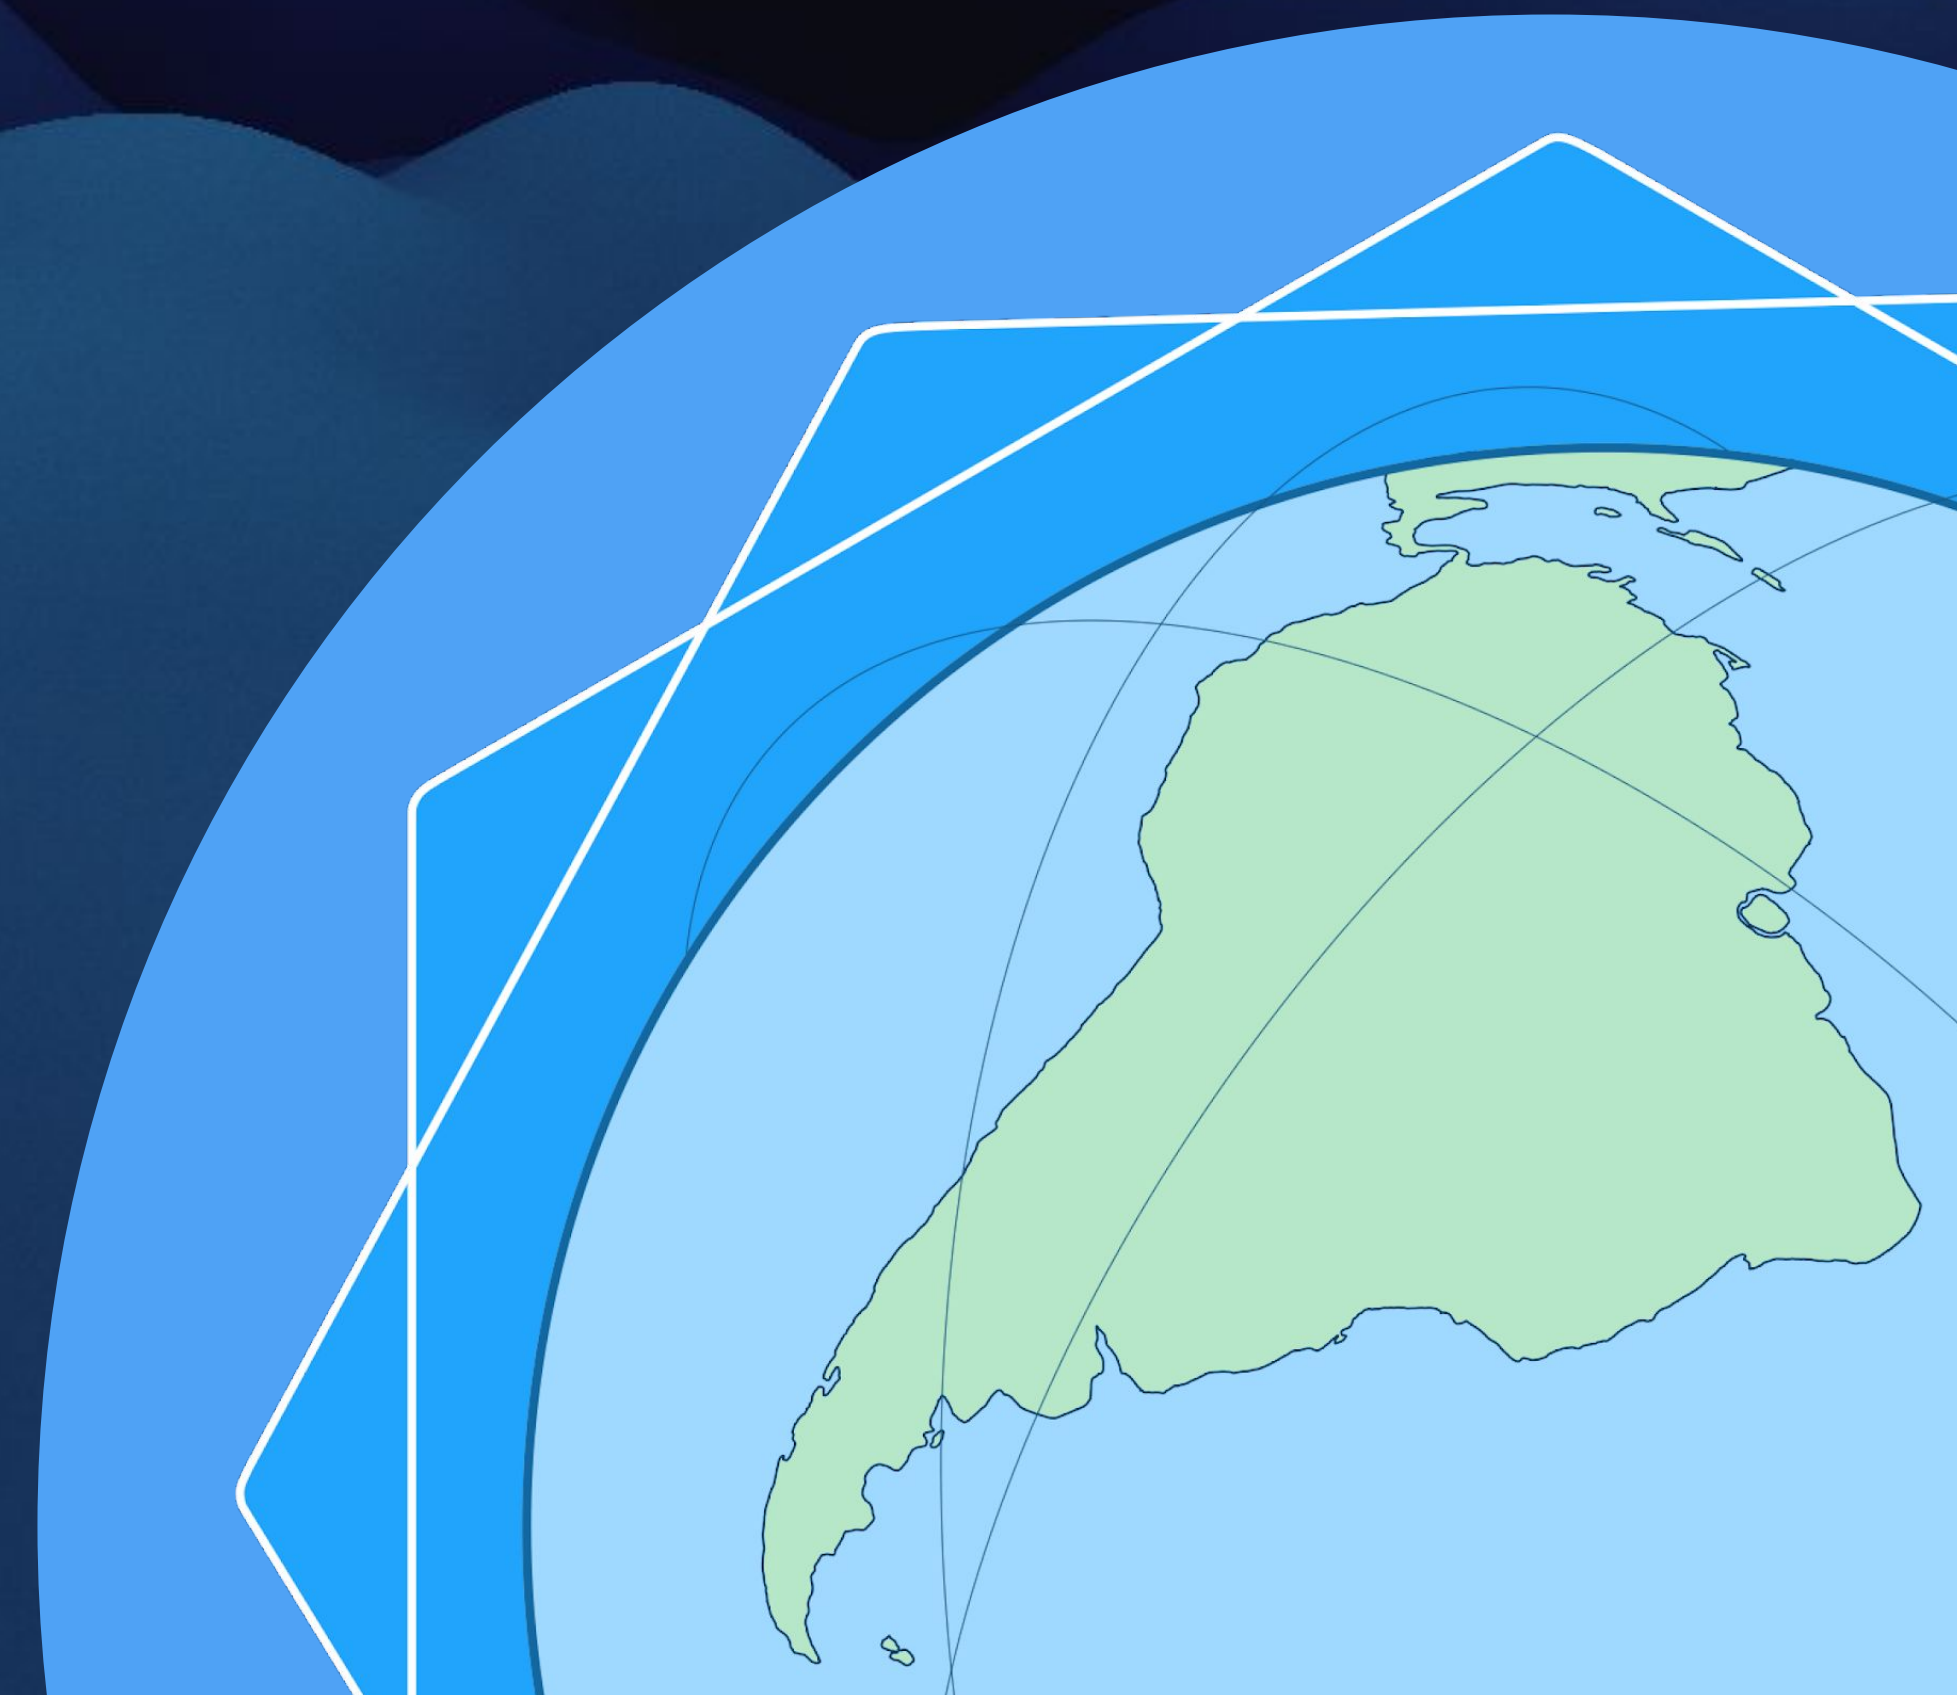

Our future is making blockchain **more accessible** worldwide

for developers & businesses

2024

- Release smart-contract **Marketplace**: developers make money selling and business improve their processes subscribing
- Expansion to **LATAM** and **North America**
- Release **GoBesu**: Ethereum blockchains for enterprise

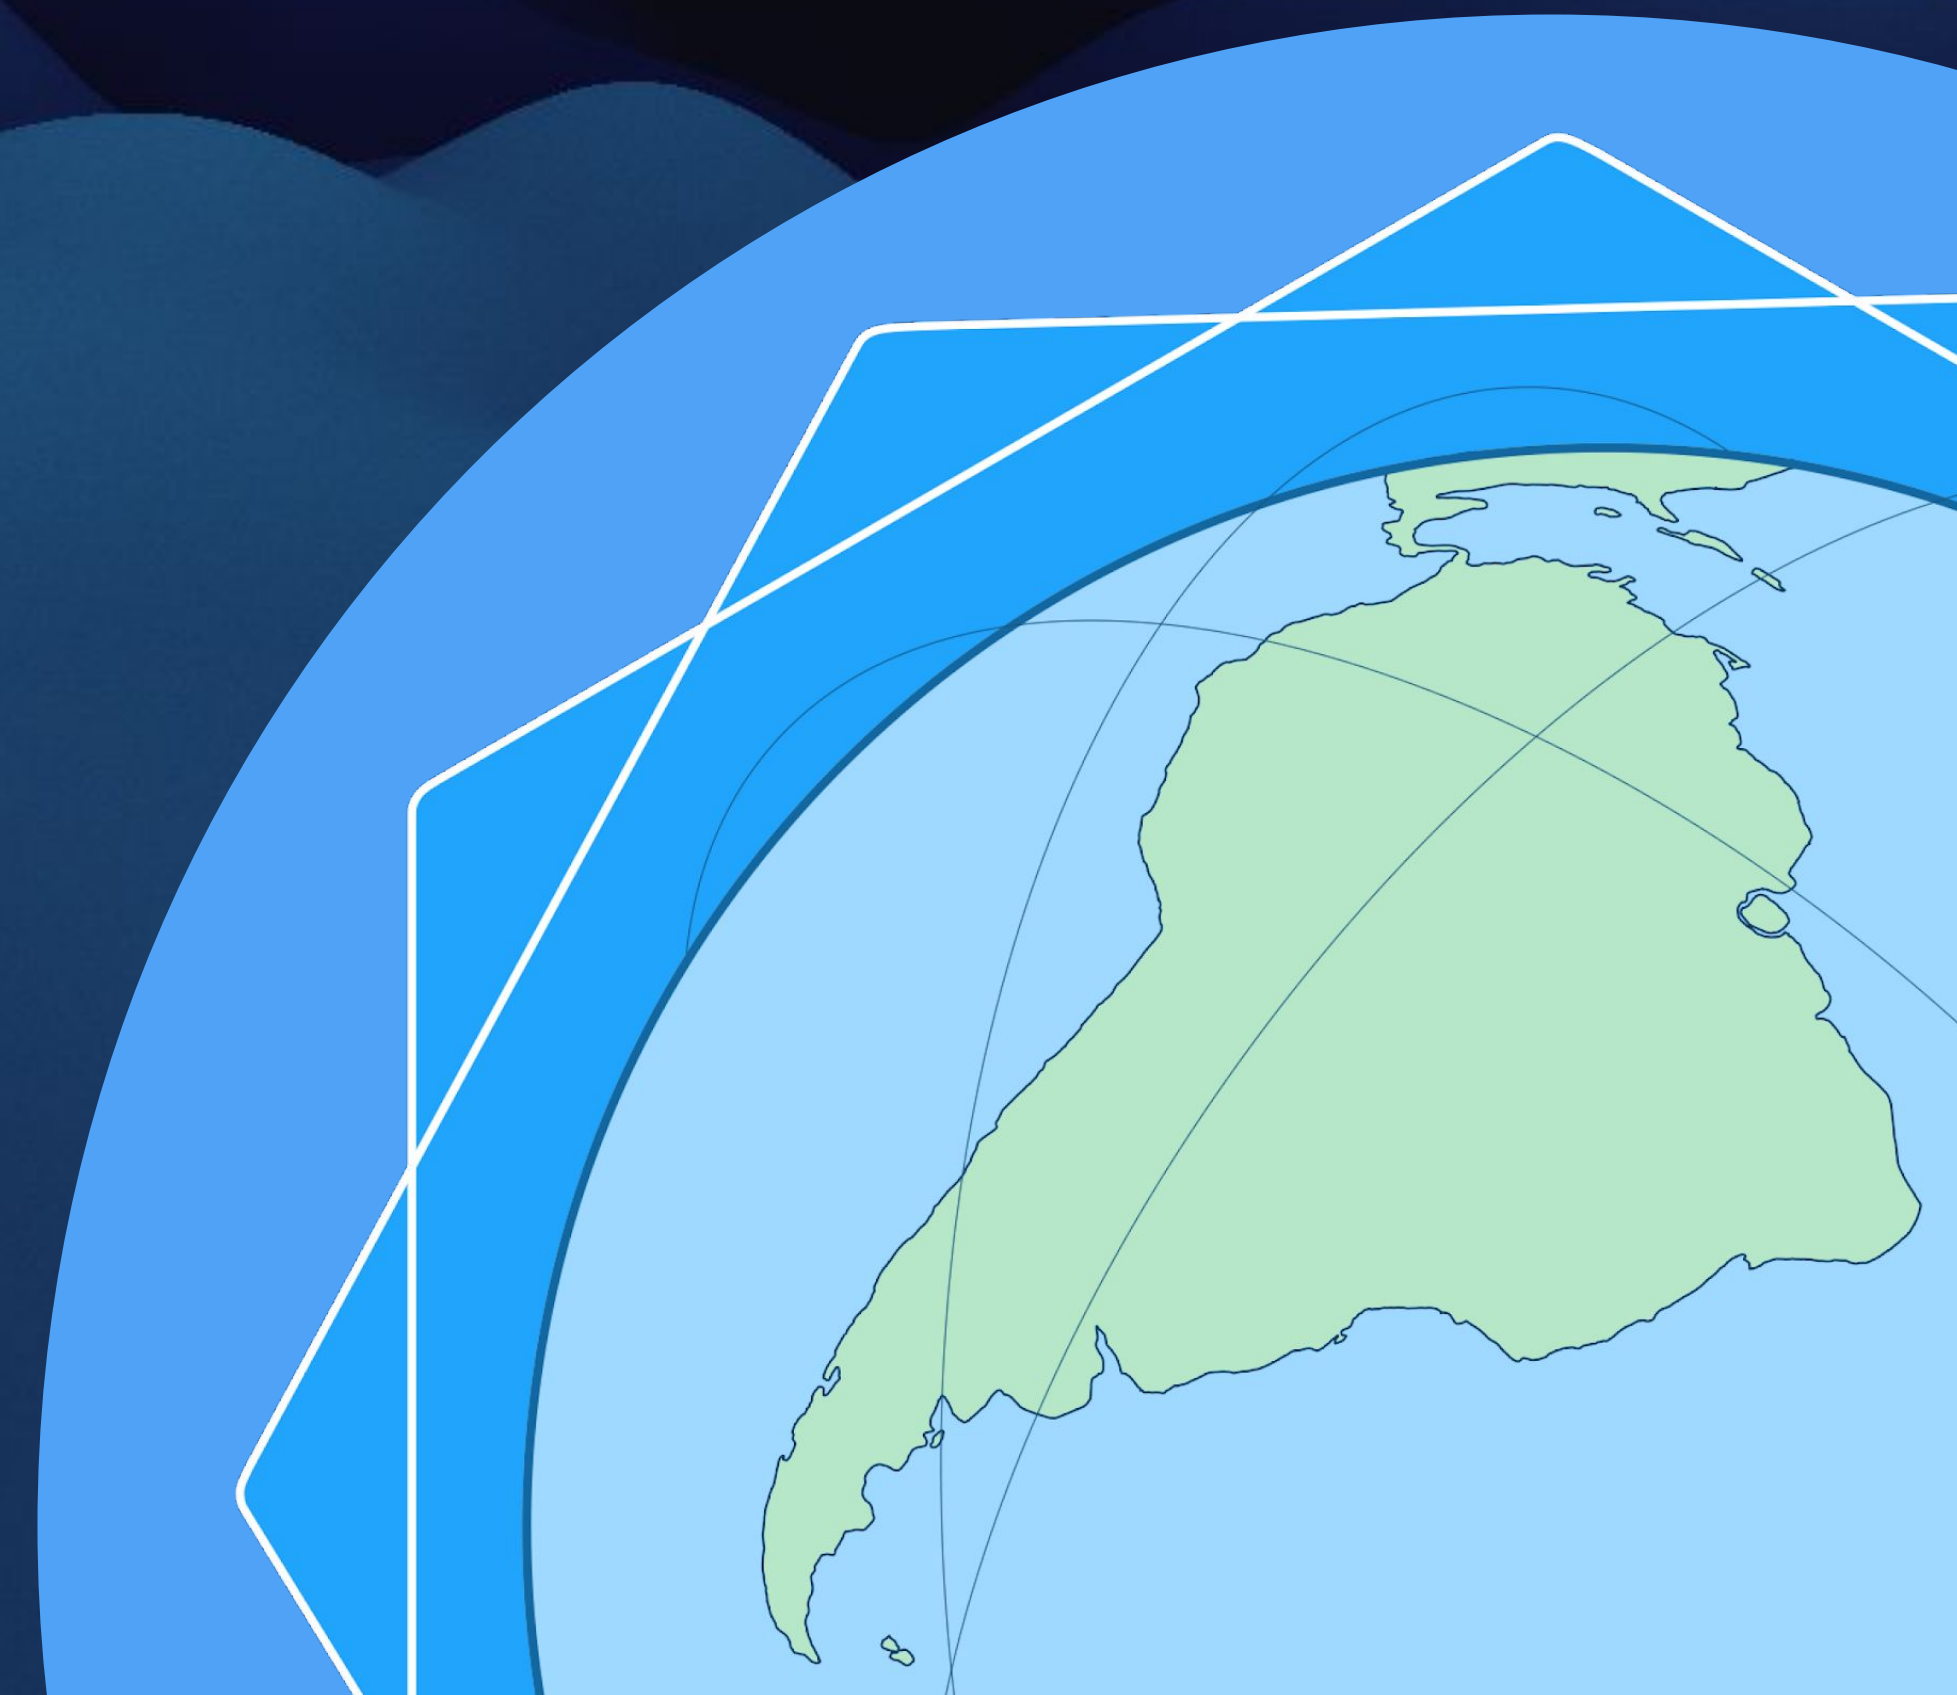

Our future is making blockchain **more accessible** worldwide

for developers & businesses

2025 GoNet

- Release **GoNet**: making blockchain even cheaper & easier with a GoLedger owned network & blockchain ecosystem
- Expansion to **Europe** and **Asia**

GoLedger

Thank you!
